Decontamination Solutions

Talley's deep cleaning service is delivered using **Electrostatic Decontamination** or **VorTEC™ Zonal Decontamination** which can be used to control outbreaks or as a preventative action to reduce the risk of transmission of highly infectious pathogens. Our decontamination service solutions utilise TECcare Antimicrobial Technologies to create and maintain the cleanest and safest healthcare environments...

Electrostatic Decontamination

Adding an electrical charge to the disinfectant as it leaves the electrostatic sprayer enhances its attraction to all surfaces and enables the disinfectant mist to 'wrap' around complex shapes, making it effortless to disinfect hard to reach locations in all areas. Practical, hand-held delivery makes **Electrostatic Decontamination** ideal for rapid and efficient coverage of large spaces or for more targeted disinfection in any environment.

Electrostatic Decontamination Service FROM £1,495

dependant on requirement

VorTEC™ Zonal Decontamination

The **VorTEC Zonal Decontamination** system is a high energy misting system for use with either VorTEC or VorTEC Plus fluid. Providing an ultra high-level disinfecting solution for air and surfaces, this simple to use, standalone, remotely operated, fogging device is specifically designed for the rapid decontamination of enclosed spaces up to 600m³ which makes it ideal for wards, communal areas, side rooms, corridors etc.

VorTEC™ Zonal Decontamination System FROM £1,995

dependant on requirement
